Aashto A Policy On Geometric Design

First published in 2001, AASHTO's guidelines aim to help highway engineers select appropriate geometric designs for local and collector roads with low daily traffic volumes. AASHTO said the first edition of its low-volume guidelines addressed the design needs of roads carrying average daily traffic volumes of 400 vehicles per day or less.

Aashto geometric design of highways
and streets 2004 most influential design
control, and the design control that
provides significant flexibility in urban
areas, is speed. For transit services,
frequency is an important attribute, but
“on-time performance” and the
pedestrian environment surrounding bus
and rail stations are also critical aspects
of the traveler experience.
