Bae 146 Training Manual

• The BAe 146 is a 3000 Gallon Type I Airtanker . • The BAe 146 can load retardant from either side . • The loading valve on the BAe146 is set into the fuselage using existing aircraft services ports. This assures the pressurization capability of the Aircraft. Use of an extension is recommended.

Hot Retardant Loading Safety Training for the Neptune Bae 146

The BAe/Avro 146/RJ series aircraft possess manually operated elevators with mechanical control circuits which operate the left and right elevators independently (see Figure 1). Control column inputs are transmitted via cables, pulleys and rods to a servo tab mounted on each elevator, which provides aerodynamic force to move the elevator.
