All of these engines had a 5.7" connecting rod length, but the wrist pin heights in the pistons were at different locations to mate up with the different stroke lengths. External dimensions and physical features on the 283, 302, 327 and 350 engines are nearly identical. Then there is the Chevy small block

400, a really unique animal.

## **Identifying a 283 from a 327 .....or a 350 - Boat Buzz**

As you know the 350Q engine is what Chris Craft called "flywheel forward". Traditionally, the transmission is attached to the flywheel end of the engine. On the 350Q engines the transmission is attached to the

# Get Free Chevy Chris Craft 350cc Engine Manual

opposite end of the engine. This is accomplished with a custom casting which covers the timing gears.
