Operators Manual Machine Guns Caliber

The M60, officially the Machine Gun, Caliber 7.62 mm, M60, is a family of American general-purpose machine guns firing 7.62×51mm NATO cartridges from a disintegrating belt of M13 links. There are several types of ammunition approved for use in the M60, including ball, tracer, and armor-piercing rounds.. It was adopted in 1957 and issued to units beginning in 1959.

M60 machine gun - Wikipedia

The Gatling gun is a rapid-firing multiple-barrel firearm invented in 1861 by Richard Jordan Gatling. It is an early machine gun and a forerunner of the modern electric motor-driven rotary cannon.. The Gatling gun's operation centered on a cyclic multi-barrel design which facilitated cooling and synchronized the firing-reloading sequence.

Gatling gun - Wikipedia

Beginning in the 17 century, air guns utilizing .30 to .51 caliber projectiles were used to hunt game such as boar and deer. Air rifles of this time period largely used some type of charging pump, such as bellows, to fill a reservoir with air and a trigger mechanism to unleash all of this pent-up air all at once, launching projectiles at ...
