### **Neuroophthalmology | Practical Neurology**

Neuro-ophthalmology deals with visual disorders caused by disease of the nervous system. The principles of diagnosis are the same as in any other branch of neurology; a good history with a directed examination. In addition, a sound knowledge of the anatomy and physiology of the visual sensory and oculomotor systems is essential. Most referrals come from ophthalmologists who either detect an ...

Section IV addresses issues that do not fit easily into the categories defined by Sections I to III. Although pain syndromes and the trigeminal nerve are sensory (afferent) concerns, these topics deserve a forum separate from discussions of the optic nerve and sensory visual system. Neurovascular and neurocutaneous diseases affect both the afferent and efferent visual systems.
